Subject : Application for PFA Internship – Computer Engineering

Dear Mr. Hiring Manager ,

I am currently in my 4th of the engineering program at ENSA Tetouan, specializing in Computer Engineering. I am writing to apply for a PFA internship at Renault Tanger Exploitation as part of my end-of-year academic requirement, for a period of maximum of 3 months between June and August 2026.

I have been closely following Renault's digital transformation efforts across its manufacturing sites. The opportunity to work on software applications for video surveillance supervision and to build mockups for the Nedap AEOS access control interface aligns perfectly with my background in software engineering, secure authentication systems, and web application development.

During my internship at Agile Square (July–August 2025), I designed and developed a full web application to automate CRA management using Laravel, reducing manual data entry by an estimated 60%. I implemented role-based access control via Keycloak (OAuth2) for 3 user roles employee, manager, and admin a mechanism directly applicable to AEOS. I also built a real-time dashboard that enabled managers to validate reports 3× faster, demonstrating my ability to design interfaces that improve operational supervision.

For my PFA, I am seeking a 3-month opportunity where I can apply my skills in full-stack development (Python, Java, React, Laravel), databases (MySQL, MongoDB), and TCP/IP networking to real industrial security systems, while learning from Renault Tanger's engineering team.

I am available for a PFA internship from June to August 2026. I am also available for an interview at your convenience.

Thank you for considering my application. I look forward to the possibility of completing my end-of-year project with Renault Tanger Exploitation.

Sincerely,

Oumaima Ameziane
